EXCLUSIVE PRODUCTS LINES

We are proud to partner with the following manufacturers and bring our customers the highest quality products and solutions on the market today.

In partnership with Preston Phipps since 1933, Armstrong has been delivering system solutions that improve utility performance, lower energy consumption, and reduce environmental emissions while focusing on products in the following spaces:

- Steam and Condensate Equipment
- Hot Water Generation and Controls
- Veris Flow Measurement
- Humidification
- Heat Transfer
- Sage® Digital Equipment Monitoring Platform
- Everactive Battery-less Steam Trap Monitoring

PRODUCTION

In our production facility, we manufacture complete customized SKID solutions to meet our customers' most stringent requirements. We are a CSA B51 certified facility and ASME certified under Section VII Div.1 with U-Stamp and B31.1 & B31.3 for Power and Process piping fabrication. We are also authorized to apply the National Board mark on Pressure vessels.

CLEARSTEAM™

COMPACKHEAT™

ENERGY SERVICES

With a track record of successfully handling difficult challenges, we deliver customized services that align with the specific challenges presented by our clients. From capital projects, to operational improvements, and maintenance programs, we are here to support our clients with their day-to-day process challenges.

SERVICES & PROJECTS

Preston Phipps offers a full range of service solutions to keep your equipment running for years to come. For both the mechanical or laboratory applications, we specialize in repairs, service calls, preventative maintenance programs and validation, certification or testing of equipment. Complete turnkey installations are also at the forefront of what we can offer to our clients.

LABORATORY SOLUTIONS

User safety, product reliability and energy efficiency are never to be compromised in critical environments. Our laboratory equipment and solutions are renowned for their excellence and performance. Our track record proves it. Along with such offerings, we provide tailored services and programs to ensure that our client's critical spaces are operating to their standards.

SEMINARS

As an industry visionary and pioneer, Preston Phipps saw the need over 40 years ago to offer in-depth, hands-on technical seminars for our clients. Today we offer an array of seminars on Steam, Hot Water and Laboratory equipment and design.

- Presented by certified engineers and qualified product specialists
- Offered in either English or French
- Conducted at our modern seminar facility
- Hands-on and interactive
- In-depth and cover installation procedures and common practices
- Continuing education certificates available
