**Preston Phipps Incorporated**, since 1933, a Canada wide engineered equipment representative agency, is seeking a graduate Mechanical Engineer for account management in a consultative sales position for permanent, full time employment in the Maritimes, starting immediately.

The position available encompasses both the technical and interpersonal aspects of account management while establishing/maintaining client relationships.

Primary fields of expertise are: thermodynamics, fluid dynamics, heat transfer, critical ventilation control & HVAC.

Preston Phipps is primarily involved in steam and industrial heat transfer systems, critical air flow control in sensitive environments, indoor environmental monitoring systems, industrial heating and ventilation systems, service or domestic water heating and control, institutional and commercial humidification systems, and custom institutional site-built air handlers.

In addition to the above, Preston Phipps has its own assembly manufacturing division divided into catalogued pre-engineered steam to heating water and steam to steam reboiler skids; and also custom engineered heat transfer, pressure vessel and fluid dynamics skids.

Aside from the mandatory technical background, public demeanor and presentation, exemplary communication skills, an aptitude for problem solving and a genuine preference for the interpersonal aspect of employment are strong benefits to the successful candidates.
