Job Description

Service Technician / Electro-Mechanical

Preston Phipps Inc

-

Montreal, QC

Since 1933, Preston Phipps has been providing products and services related to the optimization of steam distribution systems in addition to offering a complete line of valve, heating, ventilation, and air conditioning, air control, flow measurement and water treatment solutions.

With offices all across Canada, Preston Phipps continues to be a leader in the Canadian industrial and commercial marketplace. We continue to proudly represent our manufacturers on an exclusive bases while evolving into a true one stop single source solution provider offering full turnkey solutions for commercial installations, service contracts and energy audits, industrial steam optimization projects including Engineer, Procure, and project management, as well as our own CSA (Canadian Standards Association) certified shop providing fully designed and assembled packages including our CompackHeat and ClearSteam units.

Preston Phipps is the ultimate source of products, solutions and training for steam, air handling, humidification, refrigeration and laboratory applications in institutional, industrial, water treatment, mining and smelting, pulp and paper, food and beverage, petrochemical, biopharma and power and steam.

We are looking forward to adding a Service Technician / Electro-Mechanical for our **Montreal office**. The ideal candidate will be a self-starter working in an entrepreneurial environment focused on customer service.

Responsibilities include:

- Execute field start-ups as well as troubleshoot and commission mechanical / heating, ventilation, and air conditioning (HVAC) related equipment.
- Able to diagnose problems on control equipment.
- Responsible for dismantling, repairing and reassembling mechanical equipment.
- Demonstrate initiative in order to work independently and meet deadlines. Possess a solid working knowledge of the fundamentals of heating and ventilation systems, equipment and controls.
- Read and interpret mechanical drawings, control and electrical schematics, understand the requirements for all on-site installations and repairs by thoroughly examining building layouts, updating problems, gathering materials and synchronizing construction on site work.
- Communicate effectively with contractors, customers, electricians and other trades on construction projects.
- Maintain assigned stock of inventory, company equipment, and document all related activities by completing paperwork on each job, including daily time, progress, and duration.

- Provide training and follow-up training at customers sites.
- Keep current on products and their advances, including installation, operation, maintenance, service, and repair of systems and devices.
- Able to work with third party equipment/controls and understand BACnet, Modbus and other building automaton communications.

Requirements:

- Associate degree or equivalent from 2-year college or technical school and/or 1-2 years of experience in electro-mechanical field or equivalent combination of education and experience.
- Basic knowledge of controls and ventilation.
- Practical knowledge of start-up and commissioning heating, ventilation, and air conditioning (HVAC) equipment.
- Basic computer skills, including information processing using Microsoft Excel and Microsoft Word is essential.
- Comfortable working in heights and using a ladder.
- Be willing to travel within the province of Ontario and Eastern Canada on occasion.
- Must be willing to work independently and in a team environment.
- Must possess a valid driver's license for a minimum of 12 months, with no major or frequent traffic violations and clear criminal record.
- This position requires working in a variety of conditions including, but not limited to, mechanical equipment rooms and laboratories.

Benefits:

This full-time position includes:

- Competitive base salary
- Health plan
- Over-time benefits
- Company vehicle
- Job training will be provided
- Company cell phone
