Service Technician / Electro-Mechanical
Mississauga, ON

Since 1933, Preston Phipps Inc. has been a leading distributor and manufacturers' representative of Steam, Hot Water and Critical Air solutions across Canada.

We are looking forward to adding a **Service Technician** for our Toronto office. The ideal candidate has the ability to process information well, in a dynamic environment focused on customer service. In this position, the candidate will build and maintain customer relationships at various levels within our client's organization from maintenance personnel to upper management.

Responsibilities include:

- Execute field start-ups as well as troubleshoot and commission mechanical / heating, ventilation, and air conditioning (HVAC) related equipment.
- Perform regular mechanical repairs and maintenance in designated area.
- Responsible for dismantling, repairing and reassembling mechanical equipment.
- Carry-out energy audits.
- Demonstrate initiative to work independently with the ability to meet deadlines within a stressful environment. Possess sound working knowledge of heating, ventilation, and air conditioning (HVAC) fundamentals, systems, equipment, and controls.
- Read and interpret mechanical drawings, control and electrical diagrams, and understand requirements for all on-site installation and repairs by extensively examining building layouts, updating issues, gathering materials and synchronizing onsite work.
- Communicate effectively with contractors, customers, electricians and other trades on construction projects.
- Maintain assigned stock of inventory, company equipment, and document all related activities by completing paperwork on each job, including daily time, progress, and duration.
- Provide training and follow-up training at customers sites.
- Keep current on products and their advances, including installation, operation, maintenance, service, and repair of systems and devices.
- Able to work with third party equipment/controls and understand BACnet, Modbus and other building automaton communications.

Requirements:

- Associate degree or equivalent from 2-year college or technical school and/or 1-2 years of experience in electro-mechanical field or equivalent combination of education and experience.
- Basic heating, ventilation, and air conditioning (HVAC) knowledge
- Practical knowledge of start-up and commissioning heating, ventilation, and air conditioning (HVAC) equipment
- Basic computer skills, including information processing using Microsoft Excel and Microsoft Word is essential.

- Comfortable working in heights and using a ladder.
- Willing to travel within the province of Ontario.
- Must be willing to work independently and in a team environment.
- Must possess a valid driver's license for a minimum of 12 months, with no major or frequent traffic violations and clear criminal record.
- This position requires working in diverse conditions including but not limited to mechanical equipment rooms with exposure to noisy operating equipment, exposure to extreme weather conditions, precarious places, and risk of electrical shock (high voltage).

This position is highly physical and requires regular use of hands, fingers, walking, stooping, and kneeling. It requires employees to regularly lift and or move up to 10 lbs., frequently lift and or move up to 40 lbs. and occasionally lift and or move more than 40 lbs.

Benefits:

This full-time position includes:

- Competitive base salary
- Health plan
- Over-time benefits
- Company vehicle
- Profit sharing
- Job training will be provided

If you are a self-motivated, talented individual who wants to join an exciting team in a growing organization and are ready to contribute, develop and be challenged in a fast-paced environment, please apply below.
